

Supervision Bookings — Complete Client Guide

Clinical Training and Supervision Academy | CTA LMS → Bookings | 2026-08-11 | Plugin v1.0.190

1. What Is This Page?

CTA LMS → Bookings → Supervision Bookings is your **supervision calendar control panel**. Here you create time slots when Associates can attend live clinical supervision. This page is **only for the Supervision program** — it does not manage CE courses, Exam Prep programs, or general learner enrollments.

In plain language: You post available supervision appointment times. Approved Associates with an active supervision subscription see those times on their dashboard and book a seat. You monitor how many seats are filled and can cancel a slot if your schedule changes.

2. Who Can Book Sessions?

Only **Associates** with **Full supervision access** can book. Full access requires ALL of the following (managed on the Approvals page):

1. **Approval Status = Approved** (you clicked Approve on their supervision application)
2. **Active supervision plan** — purchased Group Supervision (\$260/mo) or Supervision + CE All-Access (\$350/mo), OR admin-assigned agency plan
3. **Active Stripe subscription** — payment current (not past due or cancelled)

Licensed Professionals who only buy CE or Exam Prep **never** use this Bookings page — they have no supervision sessions to schedule.

Important: An Associate waiting for approval (Supervision Application Pending) can still purchase CE courses and Exam Prep. Only supervision booking, meeting links, and BBS document uploads stay locked until approved.

3. Page Layout — What You See

Header

- **Title:** Supervision Bookings
- **Add New Session** (blue button, top right) — only on Upcoming Sessions tab

Two Tabs

Tab	Purpose	When to use
Upcoming Sessions	Open slots you created that Associates can still book	Daily — add new slots, watch seat counts, cancel if needed
Session History	Past sessions and who booked them	Weekly — review attendance records

4. Upcoming Sessions Table — Column Guide

Column	What it means	Example from your site
Date	Day the session occurs	Aug 12, 2026
Time	Start time in Pacific Time (PDT/PST)	8:00 AM PDT
Type	Group or Individual	Group
Booked / Total	Seats taken ÷ total capacity	0 / 8 = open group, nobody booked yet
Status	Green "Open" = available for booking	Open
Actions	Cancel button — removes slot and notifies booked associates	Cancel

Your current upcoming slots (example):

- Aug 12, 2026 — 8:00 AM PDT — Group — 0/8 — Open
- Aug 17, 2026 — 7:00 PM PDT — Individual — 0/1 — Open

Both are ready for Associates to book. When someone books, the first number increases (e.g. 1/8).

5. Session Types — Rules

Type	Max seats	Duration	Best for
Group	8 (you can set 1–8 in Add Session form)	120 minutes (2 hours)	Multiple associates in one supervision meeting
Individual	1 seat only	60 minutes (1 hour)	One-on-one supervision

The system prevents Associates from booking overlapping sessions on the same day (e.g. cannot book a group and individual that conflict in time).

6. How to Add a New Session (Step by Step)

1. Go to **CTA LMS → Bookings**
2. Make sure **Upcoming Sessions** tab is active
3. Click **Add New Session**
4. In the popup form, enter:
 - **Date** — pick session date
 - **Time** — enter in **Pacific Time** (site default: America/Los_Angeles)
 - **Type** — Group (max 8 seats, 120 min) or Individual (1 seat, 60 min)
 - **Total Seats** — for Group only (default 8; can reduce if smaller group)
5. Click **Create Session**
6. New row appears in Upcoming Sessions with Status = Open and 0/X booked

7. How to Cancel a Session

1. On Upcoming Sessions, find the row
2. Click **Cancel**
3. If Associates already booked seats, the system:
 - Marks their bookings as cancelled
 - Sends each booked Associate an email: "Your supervision session on [date] at [time] has been cancelled"
 - Marks the open slot as cancelled

Use Cancel when you need to remove a slot from the calendar. Associates will need to book a different session.

8. Complete End-to-End Workflow

Phase A — Before any bookings (your setup)

1. Associate registers and applies for supervision → shows Pending on Approvals
2. Associate purchases supervision plan OR you Assign Plan (agency-paid)
3. You Approve application on Approvals page → Access becomes Full (if plan active)
4. You create session slots on this Bookings page (Add New Session)

Phase B — Associate books (automatic on website)

1. Associate logs in → opens Supervision Dashboard or supervision booking page
2. Calendar shows your open sessions (Upcoming slots with available seats)
3. Associate selects a session and clicks Book
4. System confirms seat — Booked/Total updates (e.g. 0/8 → 1/8)
5. **Booking confirmation email** sent to Associate

Phase C — Before session day (automatic)

1. **Session reminder email** sent the day before (daily cron job)
2. Associate sees booked session on Supervision Dashboard
3. When session time arrives, Associate can join meeting link (if URL configured in settings)

Phase D — After session

1. Session moves to Session History tab after date passes
2. Dashboard → Recent Bookings shows latest reservations

YOU: Create slots on Bookings page

ASSOCIATE: Book seat on Supervision Dashboard

SYSTEM: Confirmation email → Reminder email → Session occurs

YOU: Review Session History for records

9. Session History Tab

Switch to **Session History** to see past and completed bookings. Columns:

Column	Meaning
User	Associate who booked
Date / Time	When session was scheduled
Type	Group or Individual
Status	Confirmed, cancelled, completed, etc.

Use this for attendance records and follow-up. Upcoming tab shows empty slots; History shows who actually booked.

10. Emails Connected to Bookings

Email	When sent	Editable in
Booking confirmation	Associate books a seat	CTA LMS → Email Settings
Session reminder	Day before scheduled session	Email Settings (session_reminder)
Session cancelled	Admin clicks Cancel on a slot with bookings	System message (hardcoded)

11. What You Control vs What Is Automatic

You (admin) control	System handles automatically
Create session dates/times	Display open slots to Associates on frontend
Choose Group vs Individual	Seat counting (Booked / Total)
Cancel sessions when schedule changes	Prevent double-booking same session
Plan how many sessions per month	Block overlapping bookings same day
Approve Associates first (Approvals page)	Send confirmation + reminder emails
Notify Associates if you cancel	Move past sessions to History

12. Relationship to Other Admin Screens

Screen	Connection
Approvals	Associates must be Approved + have plan before they can book
Users	Supervision column shows Active/Pending; Cancel subscription here

Dashboard	Recent Bookings widget — quick view of latest reservations
Settings	Page links for supervision dashboard; Stripe; timezone (Pacific)
Email Settings	Customize booking and reminder email text

13. Common Questions & Tasks

Question / Task	Answer / Action
Why 0/8 on all sessions?	Normal — slots are open; no Associate has booked yet. Share calendar with approved Associates.
Associate says they cannot book	Check Approvals → must be Approved + Full access. Check Users → supervision Active, not Past Due.
How to schedule a month of groups?	Add New Session repeatedly — create each date/time slot.
Session full (8/8)	Associates cannot book more; add another Group slot same week if needed.
Wrong time entered	Cancel slot → create new one with correct Pacific Time.
Is this for CE courses?	No. CE uses Courses + learner dashboard. Bookings is supervision only.

14. Timezone Reminder

All session times are entered and displayed in **Pacific Time (America/Los_Angeles)** — same as CE certificates and admin timestamps. When you create "8:00 AM PDT" that is what Associates see. Do not use other time zones unless you intentionally adjust.

15. Summary for the Client

Supervision Bookings is where you publish live supervision appointment slots. Create Group (up to 8 people, 2 hours) or Individual (1 person, 1 hour) sessions. Approved Associates with active supervision plans book online. You watch Booked/Total fill up, use Session History for records, and Cancel if plans change — booked Associates are emailed automatically.

Your weekly routine: (1) Check Approvals for new Associates to approve. (2) Add upcoming session slots for the next 2–4 weeks. (3) Glance at Booked/Total to see uptake. (4) Review Session History after sessions occur.
