

Course Evaluation — Complete Client Guide

Clinical Training and Supervision Academy | CTA LMS → Course Evaluation | 2026-08-11 | Plugin v1.0.190

1. What Is This Page?

CTA LMS → Course Evaluation is your admin hub for **CE course feedback**. After a learner finishes all modules and passes the final examination, they must complete a CAMFT-style evaluation form before receiving their CE certificate. This page lets you:

- **Review** every evaluation a student has submitted
- **Filter and export** submissions for compliance records (CAMFT / BBS reporting)
- **Manage** the shared CAMFT question template library used when building new CE courses

Important: Course Evaluation applies to **CE courses only**. Exam Preparation programs do **not** use evaluations or CE certificates. Supervision bookings are also unrelated.

2. Page Layout — Two Tabs

Tab	Purpose	When to use
Submissions (default)	List of student evaluation forms already submitted	Weekly review, compliance exports, reading individual feedback
Question Templates (CAMFT library)	Master question bank copied into new CE courses	When updating standard evaluation wording for future courses

Page subtitle: "Review student evaluation submissions and manage the shared CAMFT question template library used when seeding new courses."

3. Submissions Tab — Filter Submissions

Use filters to narrow the list before reviewing or exporting:

Filter	What it does
Course	Dropdown — "All CE courses" or one specific published CE course
Student search	Search by student name or email
Date from / Date to	Limit submissions to a date range
Status	All, Completed, or Draft

Apply Filters — runs the search. **Reset** — clears filters back to all submissions.

Export CSV

Click **Export CSV** to download a spreadsheet of submissions matching your current filters (up to 10,000 rows). The file includes: course ID/title, student ID/name/email, evaluation ID, all responses (JSON), summary ratings, comments, submitted date, and status. Use this for CAMFT compliance archives or internal reporting.

4. Submissions Tab — Submissions Table

Column	Meaning
Course	Full CE course title
Student	Learner name + email address
Date	When the evaluation was submitted (site timestamp)
Status	Usually completed when the learner finished the form
Actions	View — opens full submission detail

Example rows from your live site:

- *Alcoholism & Other Chemical Substance Dependency...* — Harlan Gregory (harlan@...) — 2026-08-11 04:57:29 — completed
- *California Law & Ethics for Mental Health Professionals...* — Candice Fuimaono (candice@...) — 2026-08-11 04:57:29 — completed

Both students passed their final exam, completed the evaluation, and are on track for certificate (after attestation if required).

5. Viewing a Single Submission

Click **View** on any row to open the full evaluation detail page. You will see:

- **Course** and **Student** (with clickable email)
- **Submitted** date/time
- **Status** (completed / draft)
- **Summary ratings** — Overall Rating, Content Quality, Instructor Rating, Would Recommend (Yes/No)
- **Comments** — free-text feedback if provided
- **Responses table** — every question label and the student's answer
- **Raw responses JSON** — technical backup of stored data

Use ← **Back to submissions** to return to the list.

6. Where Do Evaluation Questions Come From?

Each CE course has its **own independent evaluation form**. Questions are built in two places:

A. Per-course (Courses → Edit CE course)

On the course edit screen, scroll to the **Course Evaluation** panel. Two quick actions:

- **Sync Learning Objective Questions** — auto-creates rating questions from the course learning objectives
- **Add CAMFT / Standard Questions** — copies all questions from the shared CAMFT template library into this course

You can also add, edit, reorder, or delete individual questions per course.

B. Shared template library (this page → Question Templates tab)

The CAMFT library (course_id = 0) holds standard questions. When you click "Add CAMFT / Standard Questions" on a course, those questions are **copied** into that course — each course keeps its own copy so edits on one course do not affect others.

Note: Deleting a template question here does **not** change past student submissions. Existing courses that already copied the question are unaffected unless you edit them separately.

7. Question Templates Tab — Managing the CAMFT Library

Switch to **Question Templates (CAMFT library)** to add or edit master questions.

Add / Edit Template Question form

Field	Purpose
Section	Group label shown to students (e.g. "Course Content", "Instructor")
Question	Full question text
Type	Question format (see types below)
Options	Choices for radio/dropdown/checkbox; optional for rating (defaults 1–5 Likert + N/A)
Required	Student must answer before submitting
Status	Active, Draft, or Inactive
Summary mapping	Optional — maps answer into summary columns (rating, content_quality, instructor_rating, would_recommend, comments)

Question types available

Type	Student sees
Rating Scale (1–5 + N/A)	Likert scale: Strongly Disagree → Strongly Agree, plus N/A
Radio Button	Single choice from listed options
Checkbox	Multiple selections allowed
Short Text	Single-line text field
Paragraph	Multi-line text area
Dropdown	Single choice from dropdown menu
Information (display only)	Instruction text — no answer required

CAMFT Template Questions table

Lists all library questions with Section, Question preview, Type, Required, Status, and Edit/Delete actions. Use the **Reorder** field (comma-separated question IDs) and **Save Order** to control display order on student forms.

8. Complete CE Learner Workflow (Where Evaluation Fits)

Evaluation is step 3 in the required CE completion sequence:

- Step 1** — Complete all course modules (including Capstone if present)
- Step 2** — Pass Final Examination (70% minimum, unlimited attempts, no time limit)
- Step 3** — Submit Course Evaluation (CAMFT-style form on learner dashboard)
- Step 4** — Complete Attestation (signature confirming course completion)
- Step 5** — CE Certificate issued automatically

The learner cannot skip ahead: evaluation is locked until the final exam is passed. Certificate is locked until evaluation (and attestation) are done.

Law & Ethics course (CTA-CE-001): Attestation may be built into the evaluation form itself (Section 9). Other courses use a separate attestation step after evaluation.

9. What You Control vs What Is Automatic

You (admin) control	System handles automatically
Build evaluation questions per course (Courses → Edit)	Lock evaluation until final exam passed
Maintain CAMFT template library (this page)	Validate required questions on submit
Review submissions and export CSV	Store responses with student name, email, course, timestamp
Edit question wording for new courses	Calculate summary ratings (overall, content, instructor, recommend)
Reorder questions on template or per course	Guide learner to attestation → certificate after evaluation

10. Relationship to Other Admin Screens

Screen	Connection
Courses → Edit (CE)	Per-course evaluation question builder; Sync Objectives + Add CAMFT buttons
Dashboard	Completion stats; recent enrollments — evaluation is part of completion path
Users	Student profile; certificate history after evaluation + attestation complete
Email Settings	Certificate email sent after full completion chain
Bookings / Approvals	Not related — supervision only

11. Common Questions & Tasks

Question / Task	Answer / Action
Why no Exam Prep evaluations here?	Exam Prep has no CE certificate or CAMFT evaluation — by design.
Student says evaluation won't open	They must pass the final exam first. Check their quiz attempts on the course.
Need CAMFT report for one course	Filter by Course → set date range → Export CSV.
Update standard questions for all future courses	Edit templates on Question Templates tab. Existing courses: re-copy or edit per course.
Status shows "completed" but no certificate	Student may still need attestation (Step 4). Law & Ethics may need Section 9 signature in evaluation.

Can I delete a submission?	Not from this UI — submissions are compliance records. Contact developer if correction needed.
New CE course has no evaluation questions	Courses → Edit → Course Evaluation → Add CAMFT / Standard Questions + Sync Learning Objective Questions.

12. Compliance & Record-Keeping Tips

- Export CSV monthly or quarterly and archive for CAMFT / BBS audit trails.
- Filter by course when preparing provider reports for a specific CE offering.
- Use **View** to read individual comments before responding to learner feedback.
- Keep template library aligned with current CAMFT evaluation requirements — update templates before launching new course versions.
- Summary ratings (Rating, Content, Instructor, Recommend) appear in CSV exports for quick aggregate analysis in Excel.

13. Summary for the Client

Course Evaluation is where you review CE student feedback and manage the standard CAMFT question library. Learners complete this form after passing the final exam and before receiving their certificate. Use **Submissions** to filter, view, and export records; use **Question Templates** to maintain shared questions copied into each CE course.

Your routine: (1) When launching a new CE course, ensure evaluation questions are seeded on the course edit page. (2) Periodically review submissions and export CSV for compliance. (3) Update CAMFT templates when regulatory wording changes — then copy into affected courses as needed.
