

CTA LMS Dashboard — Client Guide

Clinical Training and Supervision Academy | Admin Overview | Generated: 2026-08-11 | Plugin v1.0.190

What Is This Screen?

When you log into WordPress and open **CTA LMS → Dashboard**, you arrive at the administrative home screen for your Learning Management System (LMS). This is your **command center**: it shows how the academy is performing and gives quick access to every management area.

The dashboard is **read-only for numbers** — you monitor activity here, then use the left menu or Quick Action buttons to make changes (publish a course, approve a learner, update settings, etc.).

The Six Summary Cards — What Each Number Means

Card	What it counts	What it tells you
Published Courses	All courses and Exam Prep programs with status Published	How many products are live on the website. Draft items are not included.
Enrolled Users	Unique learners with at least one enrollment record	How many people have signed up for at least one CE course or program.
Completions	CE enrollments marked completed	Learners who finished the full CE path: modules, final exam, evaluation, attestation, and certificate. Exam Prep does not count here.
Total Revenue	Sum of all completed payments in the LMS	Recorded payments for courses, bundles, memberships, and supervision.
Active Subscribers	Users with active supervision subscription status	Associates on a paid supervision or Supervision + CE plan — not the same as enrolled in a CE course only.
Certificates Issued	Total CE certificates ever generated	Permanent proof of CE completion. Certificates remain even if membership ends.

These numbers update automatically as learners enroll, pay, complete courses, and receive certificates.

Recent Enrollments Table

Shows the latest sign-ups (most recent first): **User**, **Course**, **Date**, and **Payment** status (e.g. completed).

Use it for: Daily check that new purchases are recording correctly. If someone paid but does not appear here, check Users or Settings → Stripe.

Recent Bookings Table

Shows supervision session bookings by associates (Clinical Supervision program — separate from CE/Exam Prep). Columns: User, Session type, Date/time, Status.

If it displays **No bookings yet**, no associate has booked a session recently.

Quick Action Buttons

Button	Takes you to	Typical use
Add New Course	Course editor	Create a new CE course or Exam Prep entry (most content is pre-built; you set price, status, details).
Approvals	Pending applications	Review associate supervision applications.
View All Users	User list	See all learners, roles, enrollments, license info.
Configure Settings	Global LMS settings	Stripe, page links, certificate text, timezone, CAMFT provider number.

Left Menu — Full Admin Workflow

1. Dashboard

Monitor stats and recent activity. No editing on this screen.

2. Courses (Most important)

- See all CE Courses and Exam Preparation Programs
- **Published** = visible on website + checkout works
- **Draft** = hidden from public (admin preview only)
- Exam Prep: Publish / Unpublish with one click
- CE courses: require CAMFT CEPA confirmation before publish (regulatory hold)
- Edit: title, price, CE hours, modules, final exam, downloads, evaluation questions

Your control rule: Published = learners can see and buy. Draft = learners cannot see or buy.

3. Users

All registered learners. View enrollments, progress, license details. Handle support and account issues here.

4. Approvals

Associate supervision applications. Approve or reject before full supervision dashboard access. Pending approval does not block someone who already purchased a CE course.

5. Bookings

Supervision session calendar and booking records.

6. Settings

- Stripe — test/live mode, keys, webhook
- Page links — CE catalog, Exam Prep catalog, login, dashboards
- Certificates — provider line (CAMFT CEPA #003369), signature
- Timezone — Pacific Time for certificates and timestamps
- Payments bypass — must be OFF on live site for real payments

7. Course Evaluation

Global CAMFT-style evaluation template. Questions sync to individual CE courses.

8. Email Settings

Automated emails: welcome, enrollment, certificate ready, payment receipt, session reminders. Edit subject and body per type.

9. Shortcodes

Reference list of shortcodes on website pages (catalog, login, dashboard, etc.).

How the Full System Works — Two Product Types

A. CE Courses (Continuing Education)

Examples: California Law & Ethics CE, Telehealth, Suicide Risk, HIV/AIDS, etc.

Learner path (automatic, sequential):

1. Purchase or access via membership
2. Watch modules in order (each unlocks after the previous is completed)
3. Pass Final Examination
4. Complete Course Evaluation (CAMFT-style form)
5. Sign Completion Attestation (electronic signature)
6. Receive CE Certificate (PDF, Pacific Time date, CAMFT provider line)

Your admin role: Keep course Draft until CAMFT CEPA approval, then Publish with confirmation. Do not publish CE courses for public sale before provider approval.

B. Exam Preparation Programs

Examples: LMFT/LCSW/LPCC Law & Ethics Exam Prep, ASWB Clinical, NCMHCE, AMFTRB National, LMFT California Clinical.

Learner path (open access, no CE certificate):

1. Purchase → 6 months access from enrollment
2. All workbooks and assessments open immediately — no module locks
3. Online workbook reading + downloadable/printable workbooks
4. Chapter tests, Practice Exam A/B, Comprehensive Final
5. Flashcards and study toolkits
6. No evaluation, no attestation, no CE certificate

Your admin role: Publish when ready for public sale; Draft to hide. Optionally extend access per learner from course edit screen.

C. Memberships, Bundles & Supervision

- Bundles / Memberships — sold via Memberships page; grant access to multiple CE courses

- Supervision — monthly subscription; associates book sessions and upload BBS documents
- Active Subscribers on dashboard = supervision subscriptions, not CE-only buyers

What You Handle vs What the Plugin Handles

You handle (admin)	Plugin handles (automatic)
Publish / Draft courses and Exam Prep	Module locking for CE courses
Approve supervision applications	Quiz scoring and pass/fail
Stripe and email configuration	Certificate generation after CE completion
Review enrollments and revenue	Exam Prep 6-month access expiry
CAMFT publish confirmation for CE	Payment recording and enrollment
Manual exam access extension (if needed)	Evaluation and attestation storage

Suggested Daily / Weekly Routine

Daily (2-3 minutes): Check Recent Enrollments for new sales. Check Approvals if badge shows pending count.

Weekly: Review Published Courses count. Confirm Total Revenue aligns with Stripe. Check Completions and Certificates for CE progress.

When launching a product: Courses → Publish → verify on website → test checkout once.

Important Reminders

1. Published = live; Draft = hidden — simple rule for Exam Prep admin work.
2. CE courses stay Draft until you publish with CEPA confirmation.
3. Exam Prep never issues CE certificates — Completions count is CE only.
4. Dashboard numbers are live from your database — not editable on this screen.
5. Check Approvals regularly — associates may be waiting for supervision access.

One-sentence summary: *The CTA LMS Dashboard is your real-time academy overview — published products, learner activity, revenue, supervision subscribers, and*

CE certificates — with links to every area where you publish courses, approve associates, manage users, and configure payments and emails.
